

# Zequn Yu

Objective: Software Engineering Intern in Summer 2020

📍 Los Angeles, CA 📞 +1 (626) 703-9018 ✉ zequnyu11@gmail.com 🌐 zequnyu.com 📄 /zequnyu

## EDUCATION

- JAN.19 - Present MSc Computer Science, **University of Southern California (USC)** 📍 Los Angeles  
Expected to graduate in **January 2021**
- SEPT.14 - JUN.18 BSc Computer Science, **University of Nottingham (UoN)** 📍 Ningbo-Nottingham  
1st class honours • GPA: 3.93/4 • Advanced courses: Haskell, Machine Learning

## SKILLS

PROGRAMMING Python, JavaScript, Java, C++, HTML/CSS, Swift, MATLAB, MongoDB, MySQL  
FRAMEWORKS React, Flask, Node.js, Express, Angular, Bulma, Scrapy, Pandas, PyQt5, Caffe  
TOOLS Git, AWS, Xcode, Travis CI, Netlify, LaTeX, Vim

## EMPLOYMENT

- MAY.19 - Present SDE student worker, **USC Robotic Embedded Systems Lab** 📍 Los Angeles  
Maintained the open-sourced reinforcement learning framework: **garage** (450+ ★) in Python, with emphasis on system and API design (20+ commits to master branch, 10,000+ lines change) • Refactored the core of garage: LocalRunner and experiment API • Contributed to Travis CI test (improved codebase coverage by 2%) and peer code review (reviewed 10+ Pull Request)
- JUN.18 - NOV.18 Full stack software engineer, **WorthNote Co., Ltd.** 📍 Shanghai  
Refactored company portfolio website in Javascript ES6 and React (Reduced loading time by 50%) • Experienced hosting back-end server (RESTful API) at Aliyun cloud by Flask, Gunicorn and Nginx • Collected and analyzed 400,000+ graduate application data records using Python Scrapy, Pandas and MongoDB
- JUL.17 - OCT.17 SDE + Research intern, **Chinese Academy of Sciences** 📍 Beijing  
Worked at Key Lab of Intelligent Information Processing with *Prof. Shiguang Shan* • Studied source code of Caffe framework and experienced its API in C++ and Python • Implemented end-to-end code for facial Action Unit (AU) detection with Large-scale unlabelled data in semi-supervised learning
- JUN.16 - SEPT.16 SDE + Test intern, **Global Tone Communication Tech Co., Ltd.** 📍 Qingdao  
Crawled 20+ websites and collected 2G+ bilingual text data in English-Chinese for *YeeSight* project using Python • Experienced web crawling libraries: beautifulsoup4, requests and selenium • Used JUnit for performance and integration test of translation API in Java

## PROJECTS

- NOV.18 - APR.19 **uRank - University Rankings Collection** 📍 Los Angeles  
Collected and performed 5 years QS/Times/ARWU/USNews ranking data using Python Scrapy • Built React website for data visualization, hosted data by Node.js and deployed with Netlify CI • Experienced JavaScript ES6, create-react-app, Next.js, Bulma, styled-components and Chart.js
- OCT.17 - MAY.18 **Workload and Facial Expression Linkage Analysis** 📍 Nottingham  
UoN Mixed Reality Lab | Advisor: *Dr. Max Wilson*  
Recruited 20 participants for facial and brain workload data collection • Used fNIRS brain scanner to evaluate workload • Built PyQt5 GUI software for HCI experience • Benchmarked facial AUs and fNIRS by machine learning models such as SVM, ANN using MATLAB and achieved 73.3% on F1 score
- SEPT.16 - MAY.17 **Travel Dashboard: Travel Expense Track and Analysis** 📍 Nottingham  
UoN & Atos UK Limited | Advisor: *Prof. Natasa Milic-Frayling*  
Developed JavaFx desktop software to support travel expense track from Excel raw data input to PDF report generation • Built user system using MySQL • Coordinated with *Atos UK*'s engineers and experienced agile development • Achieved highest personal score (92) of the year in CS school
