Zequn Yu

Objective: Software Engineering Intern in Summer 2020

📍 Los Angeles, CA   📞 +1 (626) 703-9018   ✉ zequnyu11@gmail.com   🌐 zequnyu.com

EDUCATION

JAN.19 - *Present*   MSc Computer Science, **University of Southern California (USC)** 📍 Los Angeles
Expected to graduate in **January 2021**

SEPT.14 - JUN.18   BSc Computer Science, **University of Nottingham (UoN)** 📍 Ningbo-Nottingham
1st class honours • GPA: 3.93/4 • Advanced courses: Haskell, Machine Learning

SKILLS

PROGRAMMING	Python, JavaScript, Java, C++, Swift, MATLAB, HTML/CSS, MongoDB, MySQL
FRAMEWORKS	React, Flask, Scrapy, Pandas, PyQt5, Next.js, Bulma, Caffe
TOOLS	Git, Travis CI, Netlify, LaTeX, Vim, Markdown, Prezi, Pixelmator

EMPLOYMENT

MAY.19 - *Present*   SDE student worker, **USC Robotic Embedded Systems Lab** 📍 Los Angeles
Maintain the open-sourced reinforcement learning framework project: **garage** (450 ★) in Python, with emphasis on system design and implementation (20+ commits to master branch, 10,000+ lines change) • Refactor the core of garage: LocalRunner and experiment API • Contribute to Travis CI test (improved codebase coverage by 2%) and peer code review (reviewed 10+ Pull Request)

JUN.18 - NOV.18   Full stack software engineer, **WorthNote Co., Ltd.** 📍 Shanghai
Refactored company website using Javascript and React (Reduced loading time by 50%) • Experienced hosting back-end server (RESTful API) at Aliyun cloud using Flask, Gunicorn and Nginx • Collected and analyzed 400,000+ graduate application data records using Python Scrapy, Pandas and MongoDB

JUL.17 - OCT.17   Research + SDE intern, **Chinese Academy of Sciences** 📍 Beijing
Worked at Key Lab of Intelligent Information Processing with *Prof. Shiguang Shan* • Studied source code of *Caffe* framework and experienced its API in C++ and Python • Implemented end-to-end code for facial Action Unit (AU) detection with Large-scale unlabelled data in semi-supervised learning

JUN.16 - SEPT.16   SDE intern, **Global Tone Communication Tech Co., Ltd.** 📍 Qingdao
Crawled 20+ websites and collected 2G+ bilingual text data in English-Chinese for *YeeSight* project using Python • Experienced web crawling libraries: beautifulsoup4, requests and selenium

PROJECTS

NOV.18 - APR.19   **uRank - University Rankings Collection** 📍 Los Angeles
Collected and performed 5 years QS/Times/ARWU/USNews ranking data using Python Scrapy • Built React website for data visualization, and deployed with Netlify continuous integration • Experienced JavaScript ES6, create-react-app, Next.js, Bulma, styled-components and Chart.js

OCT.17 - MAY.18   **Workload and Facial Expression Linkage Analysis** 📍 Nottingham
UoN Mixed Reality Lab | Advisor: *Dr. Max Wilson*
Recruited 20 participants for facial and brain workload data collection • Used fNIRS brain scanner to evaluate workload • Built PyQt5 GUI software for HCI experience • Benchmarked facial AUs and fNIRS by machine learning models such as SVM, ANN using MATLAB and achieved 73.3% on F1 score

SEPT.16 - MAY.17   **Travel Dashboard: Travel Expense Track and Analysis** 📍 Nottingham
UoN & Atos UK Limited | Advisor: *Prof. Natasa Milic-Frayling*
Developed JavaFx desktop software to support travel expense track from Excel raw data input to PDF report generation • Built user system using MySQL • Coordinated with *Atos UK*'s engineers and experienced agile development • Achieved highest personal score (92) of the year in CS school
