Zequn Yu

Objective: Software Engineering Intern in Fall 2020

⚲ Los Angeles, CA   ☎ +1 (626) 703-9018   ✉ zequnyu11@gmail.com   🌐 zequnyu.com

EDUCATION

JAN.19 - *Present*	MSc Computer Science, **University of Southern California (USC)** ⚲ Los Angeles Expected to graduate in **January 2021**
SEPT.14 - JUN.18	BSc Computer Science, **University of Nottingham (UoN)** ⚲ Ningbo-Nottingham 1st class honours • GPA: 3.93/4 • Advanced courses: Haskell, Machine Learning

SKILLS

PROGRAMMING	Python, JavaScript, Java, C++, HTML/CSS, Swift, MATLAB, MongoDB, MySQL
FRAMEWORKS	React, Flask, Node.js, Express, Angular, Bulma, Scrapy, Pandas, PyQt5, Caffe
TOOLS	Git, Xcode, Travis CI, Netlify, LaTeX, Vim

EMPLOYMENT

MAY.19 - *Present*	SDE student worker, **USC Robotic Embedded Systems Lab** ⚲ Los Angeles Maintained the open-sourced reinforcement learning framework: **garage** (450+ ★) in Python, with emphasis on system and API design (20+ commits to master branch, 10,000+ lines change) • Refactored the core of garage: LocalRunner and experiment API • Contributed to Travis CI test (improved codebase coverage by 2%) and peer code review (reviewed 10+ Pull Request)
JUN.18 - NOV.18	Full stack software engineer, **WorthNote Co., Ltd.** ⚲ Shanghai Refactored company portfolio website in Javascript and React (Reduced loading time by 50%) • Experienced hosting back-end server (RESTful API) at Aliyun cloud by Flask, Gunicorn and Nginx • Collected and analyzed 400,000+ graduate application data records using Python Scrapy, Pandas and MongoDB
JUL.17 - OCT.17	SDE + Research intern, **Chinese Academy of Sciences** ⚲ Beijing Worked at Key Lab of Intelligent Information Processing with *Prof. Shiguang Shan* • Studied source code of *Caffe* framework and experienced its API in C++ and Python • Implemented end-to-end code for facial Action Unit (AU) detection with Large-scale unlabelled data in semi-supervised learning
JUN.16 - SEPT.16	SDE + Test intern, **Global Tone Communication Tech Co., Ltd.** ⚲ Qingdao Crawled 20+ websites and collected 2G+ bilingual text data in English-Chinese for *YeeSight* project using Python • Experienced web crawling libraries: beautifulsoup4, requests and selenium • Used JUnit for performance and integration test of translation API in Java

PROJECTS

NOV.18 - APR.19	**uRank - University Rankings Collection** ⚲ Los Angeles Collected and performed 5 years QS/Times/ARWU/USNews ranking data using Python Scrapy • Built React website for data visualization, hosted data by Node.js and deployed with Netlify CI • Experienced JavaScript ES6, create-react-app, Next.js, Bulma, styled-components and Chart.js
OCT.17 - MAY.18	**Workload and Facial Expression Linkage Analysis** ⚲ Nottingham UoN Mixed Reality Lab | Advisor: *Dr. Max Wilson* Recruited 20 participants for facial and brain workload data collection • Used fNIRS brain scanner to evaluate workload • Built PyQt5 GUI software for HCI experience • Benchmarked facial AUs and fNIRS by machine learning models such as SVM, ANN using MATLAB and achieved 73.3% on F1 score
SEPT.16 - MAY.17	**Travel Dashboard: Travel Expense Track and Analysis** ⚲ Nottingham UoN & Atos UK Limited | Advisor: *Prof. Natasa Milic-Frayling* Developed JavaFx desktop software to support travel expense track from Excel raw data input to PDF report generation • Built user system using MySQL • Coordinated with *Atos UK*'s engineers and experienced agile development • Achieved highest personal score (92) of the year in CS school
